Metabolism (ESPEN). This approach (see Figure 1 below) focuses on three etiologies: starvation-related malnutrition, chronic disease-related malnutrition, and acute disease or injury-related malnutrition. It also takes into consideration the role of inflammation as an important factor in the increased risk for malnutrition.

Medical Management of Malnutrition (Undernutrition)

Intestine transplantation (intestinal transplantation, or small bowel transplantation) is the surgical replacement of the small intestine for chronic and acute cases of intestinal failure.While intestinal failure can oftentimes be treated with alternative therapies such as parenteral nutrition (PN), complications such as PN-associated liver disease and short bowel syndrome may make ...

Intestine transplantation - Wikipedia

The core function of a multidisciplinary team (MDT) is to bring together a group of healthcare professionals from different fields in order to determine patients' treatment plan. Most of head and neck cancer (HNC) units are currently led by MDTs that at least include ENT and maxillofacial surgeons, radiation and medical oncologists. HNC often compromise relevant structures of the upper ...
