Industrial Chemicals Their Characteristics And Development ...

Industrial chemicals are those chemicals which are manufactured for different industrial applications. These chemicals are found in fuels, dyes, anti freezes, explosives, lubricants, insulators and so forth.

Different Types of Industrial Chemicals and Their Uses

containing them. Apart from industrial uses, a large number of chemicals are used in domestic products and so their use and disposal is less controlled than that of industrial chemicals. For example, industrial chemicals such as food additives, surfactants and medicines are used directly in human life.

Industrial Chemicals
