Learning Electrocardiography A Complete Course

Dr. Constant's book is 586 pages long and is based on the technique of question-and-answer. The book has been conceived as a "complete course" in electrocardiography; in the preface, the author declares his intent to use Socratic methods based on Robert Grant's frontal and horizontal hexaxial vector approach.

...

Learning Electrocardiography may best be described as a rather practical "how to do it" approach, with questions and answers in a "Socratic method." The method may not be superior to either a purely narrative, or to a strictly programmed textbook, but this particular volume happens to contain good questions and good
