Originally published in

Access Free Silverstein Spectrometric Solutions

1962, this was the first book to explore the identification of organic compounds using spectroscopy. It provides a thorough introduction to the three areas of spectrometry most widely used in spectrometric identification: mass spectrometry, infrared spectrometry, and nuclear magnetic resonance spectrometry.

The stock solution of 3-MoSA and HxSA was prepared in water (10 mM) and used to spike standards samples.

Working solutions of 3-MoSA were prepared by serial dilution in water (0.01, 0.1, 1, 10, 100, and 1000 $\mu\text{g/l}$), and the working concentration of the HxSA internal standard (I.S.) was prepared by diluting the stock with
